GROUP

Spring Newsletter

We're thrilled to share our latest news with our community, and invite you to take a look at some of our upcoming projects.

COMING SOON: Allentown's New School

We are thrilled to announce that we will be partnering with the Town of Allentown, NH to design their new school for grades K-8. Town residents voted to approve the project in March, and we look forward to taking the next steps. [Learn more.](#)

Coming Soon: Recipients of the Turner Group Scholarship

Thank you to everyone who helped spread the word about our new **scholarship** supporting New Hampshire's aspiring architects and engineers in their career pursuits. We've narrowed down the list of finalists and are looking forward to announcing the recipients, so keep an eye out for a very special email in the coming weeks!

Designing for High-Tech Clients

Our design team is excited to participate with [Hodess Cleanroom Construction](#) on the Ultium Cells Project in Lordstown, OH. The facility will manufacture lithium-ion batteries for General Motors' vehicles. [Read more.](#)

DID YOU KNOW...?

Ferdinand Cheval, a French postman who loved architecture, spent 33 years building a palace in his back yard using water-worn stones he found along his daily mail route. He completed his "[Palais Idéal](#)" in 1912. The bizarre structure still stands in Hauterives, France, where it is recognized as a national landmark.

If you have questions about **our work**, or if you have an upcoming project you would like to discuss, let us know!
